Measuring Guide

MEASURING INSTRUCTIONS

Set-up "A-B" Reference Line

- Reference line must be a minimum of 20 feet long and placed at least 3 feet back from the pool's edge. Line, if extended, must not intersect pool's edge.
- Measurements will be taken from both ends of this line. There cannot be any obstructions between pool and reference line.

Sketch Pool Layout

- Provide a sketch of the pool shape and show "A-B" reference line in relation to pool.
- Locate all special items that exist at pool sight indicated on page 4.
- Provide photographs for all special items such as waterfalls, overhanging rock formations, raised walls, stepped decks, planters . . . etc.

Mark Pool Edge

- Place chalk marks around the inside edge of the pool. Space these points between 2ft. to 3ft. apart.
- Mark the beginning and end of all special areas, space additional points in these areas 12" apart
- Mark all items within 3 feet of the pool that are not removable.
- Number all points on and around the pool.

Measure Distances

- Measure from each end of "A-B" reference line to each point around the pool.
- Record all distances in the numbered columns. Each numbered point

Additional Information Check List

The check list below refers to items commonly found at pool sights. If the item can be removed, (ex. pool ladder) answer the question "No". For items answered "Yes" which fall within 3 feet of the pool's edge, the cover may need to be designed to go around the object. These items must be noted on your pool sketch and accurate "A-B" measurements taken. Photographs are required for rock formations, waterfalls, raised walls . . . etc.
